

# Policy and Funding

**JOSE L. MELENDREZ, MSW  
SCHOOL OF COMMUNITY HEALTH SCIENCES  
UNIVERSITY OF NEVADA, LAS VEGAS**

# Components, activities, competencies, and capacities

- Many community agencies did not feel they were part of the local public health system
- Many survey responses were marked No Knowledge
- Greatest health challenges- highly complex
- To ensure health equity must address social determinants

**Together these findings indicate a need to educate the community and stakeholders about public health and provide resources to build capacity**

# Needed a **Health in All Policies Approach** to make changes

Health in All Policies (HiAP) is:

A change in the systems that determine **how decisions are made and implemented by agencies to ensure** that public policies, plans, projects and programs have neutral or **beneficial impacts on the determinants of health**

# HiAP- Health in All Policies

## **7 key Components**

1. Support collaboration-shared direction
2. Benefit multiple partners
3. Engage traditional and nontraditional stakeholders-  
build capacity
4. Create structural or process change- training
5. Promote health equity & sustainability- social  
determinants
6. Accountability, transparency and participatory  
processes
7. Practical cross-sector initiatives build partnerships and  
trust

# Policy

Goal educate community and stakeholder as to Health in All Policies, public health, healthy equity, health disparities and social determinants

- Speakers bureau
- Resources
- Tracking
- Review and improve

# Speakers Bureau
